TMVA: overtraining check

Kolmogorov-Smirnov test: signal (background) probability = 0.889 (0.231)

Signal (test sample) — Signal (training sample)
Background (test sample) — Background (training sample)

y-axis: (1/N) dN / dx

x-axis: BDT response

U/O-flow (S,B): (0.0, 0.0)% / (0.0, 0.0)%
